Monday, Oct. 26, 7 p.m.**

**_x000B_ CANCER BREAKTHROUGHS
TOPIC OF TALK SERIES**

A three-part series on cancer, from basic prevention techniques to new treatments, will launch the UCSB General Affiliates' 1998-99 Science Lite Program.

Dr. Fred Kass, director of research for the Cancer Foundation of Santa Barbara, will provide an overview of contemporary cancer diagnosis and treatment methods at the University Club on Monday, Oct. 26 at 7 p.m. The University Club is located at 1332 Santa Barbara Street.

On Monday, Nov. 16, Les Wilson, UCSB professor of biochemistry, will discuss basic research and cancer drug development. On Monday, Dec. 7, UCSB research biologist Mary-Ann Jordan's topic will be basic science and its potential for treating or curing cancer.

Science Lite is a program for non-scientists interested in gaining a fundamental understanding of science and technology, as well as for those who have not had the opportunity to keep up with the myriad of advances in science. Among the

areas of cutting edge research at UCSB the series explores are: biotechnology, computers and software, communications, materials, and ecology. The public may

call 893-4388 for reservations.

About UC Santa Barbara

The University of California, Santa Barbara is a leading research institution that also provides a comprehensive liberal arts learning experience. Our academic community of faculty, students, and staff is characterized by a culture of interdisciplinary collaboration that is responsive to the needs of our multicultural and global society. All of this takes place within a living and learning environment like no other, as we draw inspiration from the beauty and resources of our extraordinary location at the edge of the Pacific Ocean.
