Enriching Opportunities for People with Disabilities

With a grant from the California Coastal Commission, the Adapted Recreation Program at UC Santa Barbara has purchased a beach accessible wheelchair that is available for free public use at Campus Point.

To take advantage of this opportunity, call the program office at 805-448-6740.

The year-round Adapted Recreation Program serves children and adults with physical and developmental disabilities.

UCSB collaborates with local agencies and municipalities to provide expanded sports and recreational activities tailored to special needs of participants both on campus and in the surrounding region.

Scholarships are available for all clinics and camps.

Since the program began last summer with the Junior Wheelchair Sports Camp, participation has been strong.

Upcoming activities include hand cycling clinics on November 6 and 20, with additional clinics scheduled December through February of 2005.

A tandem hand cycling clinic for the visually impaired will be held on Feb. 5 and 19.

The cost of each clinic is \$10.

For more information about upcoming events, contact Rick Van Hoorn, program coordinator, at (805) 448-6740 or by e-mail: rick.vanhoorn@par.ucsb.edu

About UC Santa Barbara

The University of California, Santa Barbara is a leading research institution that also provides a comprehensive liberal arts learning experience. Our academic community of faculty, students, and staff is characterized by a culture of interdisciplinary collaboration that is responsive to the needs of our multicultural and global society. All of this takes place within a living and learning environment like no other, as we draw inspiration from the beauty and resources of our extraordinary location at the edge of the Pacific Ocean.
