UCSB Mathematics Professor Awarded Cole Prize

James McKernan, professor of mathematics at UC Santa Barbara, and Christopher Hacon of the University of Utah have been named winners of the 2009 American Mathematical Society (AMS) Frank Nelson Cole Prize in Algebra. Presented every three years by the AMS, the Cole Prize is one of the highest distinctions in algebra. The prize was awarded Tuesday at the Joint Mathematics Meetings in Washington, D.C.

According to the prize citation, McKernan and Hacon were awarded the Cole Prize "for their groundbreaking joint work on higher dimensional birational algebraic geometry. This work concerns the minimal model program, by which S. Mori and other researchers made great progress in understanding the geometry of three-dimensional projective algebraic varieties in recent decades. The case of dimension greater than three, however, remained largely open. The work of Hacon and McKernan has transformed the study of the minimal model program in higher dimensions."

The citation specifically notes two papers by Hacon and McKernan, "Boundedness of pluricanonical maps of varieties of general type," *Inventiones Mathematicae* 166 (2006), 1-25, and "Extension theorems and the existence of flips," in *Flips for 3-folds and 4-folds*, 76-110, Oxford Lecture Series in Mathematics and Its Applications 35, Oxford University Press (2007).

The full citation for this prize and additional information about AMS prizes can be found at <http://www.ams.org/prizes-awards>.

About UC Santa Barbara

The University of California, Santa Barbara is a leading research institution that also provides a comprehensive liberal arts learning experience. Our academic community of faculty, students, and staff is characterized by a culture of interdisciplinary collaboration that is responsive to the needs of our multicultural and global society. All of this takes place within a living and learning environment like no other, as we draw inspiration from the beauty and resources of our extraordinary location at the edge of the Pacific Ocean.
