NASA VAN TO VISIT SANTA BARBARA SCHOOLS

A van packed with astronaut suits and other accouterments of space exploration will be in Santa Barbara next week, Tuesday, Nov. 16, through Friday, Nov. 19. Donald M. Scott, an aerospace education specialist from NASA's Ames Research Center, will present lecture demonstrations on earth and space exploration.

"It's particularly fitting that Scott's visit coincides with National College Week," said Chris Foster, K-14 Academic Outreach Coordinator for UCSB's College of Letters and Science. "Our goal is to encourage children to think big---that there are endless career possibilities to be gained by a college education."

National College Week is part of the U.S. Department of Education's "College Is Possible" campaign, which is aimed at alerting students and parents to the variety of postsecondary institutions and financial options that are available to young people interested in attending college.

Scott will visit classrooms as well as give presentations. All events are free. For information and reservation, call 893-7970. The schedule for the NASA van visit is:

About UC Santa Barbara

The University of California, Santa Barbara is a leading research institution that also provides a comprehensive liberal arts learning experience. Our academic community

of faculty, students, and staff is characterized by a culture of interdisciplinary collaboration that is responsive to the needs of our multicultural and global society. All of this takes place within a living and learning environment like no other, as we draw inspiration from the beauty and resources of our extraordinary location at the edge of the Pacific Ocean.
