UC Santa Barbara Environmental Professor to Discuss Lessons Learned from Hurricane Katrina

William R. Freudenburg, Dehlsen Professor of Environment and Society at UC Santa Barbara, will discuss the causes and consequences of Hurricane Katrina along the Gulf Coast on Thursday, September 29 at 2 p.m. in the Isla Vista Theater, 935 Embarcadero del Norte.

The event is free and open to the public.

Titled "Equity in the Eye of the Hurricane: Lessons Learned?" the talk will summarize the ways in which human causes and natural forces interacted to create one of the worst disasters in American history.

Freudenburg will also discuss the mass media's coverage of the event and its aftermath, and offer an initial assessment of the lessons that can be learned from the tragedy of Hurricane Katrina.

The talk is the first in a series of lectures on Equity and the Environment planned for this academic year.

UCSB's Critical Issues in America Program is supported by a grant from the Office of the Provost, College of Letters and Science.

About UC Santa Barbara

The University of California, Santa Barbara is a leading research institution that also provides a comprehensive liberal arts learning experience. Our academic community of faculty, students, and staff is characterized by a culture of interdisciplinary collaboration that is responsive to the needs of our multicultural and global society. All of this takes place within a living and learning environment like no other, as we draw inspiration from the beauty and resources of our extraordinary location at the edge of the Pacific Ocean.
