Public Review Reopens for UCSB Long Range Plan With Community Workshop Set for March 12

The public has another opportunity to comment on portions of the draft environmental impact report (DEIR) for UC Santa Barbara's Long Range Development Plan (LRDP).

University officials have announced that, as a result of public comments on the DEIR released last spring, several chapters have been revised and are being circulated for public review. The LRDP will help the campus plan its future to the year 2025. The release of the documents last spring followed several years of preparation and planning, as well as presentations to 40 neighborhood, civic, and community organizations.

The seven-week public comment period on the revisions opened Monday, February 9, 2009, and will close March 30, 2009. Public comment will be taken only on the newly circulated chapters covering water supply and demand, wastewater capacity, traffic modeling, population and housing, and greenhouse gas emissions, as well as some miscellaneous parts of the report.

A pdf version of the chapters open for new comment is available on the LRDP Web site, www.UCSBVision2025.com. Comments may be mailed to the UCSB Office of Campus Planning & Design, c/o Vision2025, Santa Barbara, CA 93106-1030 or sent

via e-mail to info@UCSBVision2025.com.

The public can learn more about the new and revised material at a community workshop scheduled for Thursday, March 12, from 7 to 8:30 p.m.

The workshop will be held in the Linda Vista Room at UCSB's Santa Catalina Hall (formerly Francisco Torres). The address is 6850 El Colegio Road, Goleta, at the corner of El Colegio and Storke Road.

For additional information, e-mail info@UCSBVision2025.com.

About UC Santa Barbara

The University of California, Santa Barbara is a leading research institution that also provides a comprehensive liberal arts learning experience. Our academic community of faculty, students, and staff is characterized by a culture of interdisciplinary collaboration that is responsive to the needs of our multicultural and global society. All of this takes place within a living and learning environment like no other, as we draw inspiration from the beauty and resources of our extraordinary location at the edge of the Pacific Ocean.
